## Summary

Software Test Engineer II with four + years of experience with web application testing. with four peak seasons spent coordinating, scheduling and running load tests first for the GoodsCX team then for the Perf Tools team. For the 2016 peak season, I was able to get the GoodsCX team's load testing efforts going two months earlier than the previous year. This resulted in GoodsCX being done with load testing a month ahead of schedule, freeing up extra time slots for last-minute testing by other teams. The 2017 peak season I help move the Perf Tools team to BlazeMeter helping with data retention for load tests. I would like to bring this effort as well as my knowledge and skills full time to APN Consulting Inc.

## Work History

### Groupon – (Performance Tools Team)
**Software Development Engineer in Test II**        02/17 – 02/19

responsibilities include running Load Tests for testing multiple services for Super Bowl and Black Friday peak periods. Contributing to the development of the automation framework for load tests by developing in Node.js the Perf Tools Dashboard used for scheduling tests and generating reports. Also helping out developing in Java the back end Perf Tools Service.

### Groupon – (GoodsCX Team)
**Software Test Engineer II**        01/16 – 01/17

was in charge of writing test suites for new features including outlines for automation tests. Contributing to the development of the automation framework by creating utility classes and coding automation tests. Running test automation against various aspects of the site and verifying the results along with manual checks on all major browsers. Also contributing to the improvement of the test procedures and methodologies for the development, QA and deployment processes.

### Groupon – (GoodsCX Team)
**Software Test Engineer I**        05/15 – 12/15

contributed to the development of the automation framework used by the team by coding utility methods used by multiple test classes. Responsible for the organization of load testing all the team's apps and services.

### Insight Global - Assignment at Groupon (GoodsCX Team)
**Quality Assurance Engineer**        06/14 – 05/15

running test automation against various aspects of the site and verifying the results along with manual checks on all major browsers. Attending and contributing to daily standup meetings. Writing test passes in TestRail for multiple projects, contributing to the improvement of the test methodologies, and documentation of the constantly changing feature sets by: Tracking down cookie functionality, and updating wiki with current deal creation design implementation.

### CompuCom System Inc. - Assignment at Microsoft Games
**Test Associate II**        09/13 – 12/13

was an active member of the test team; by suggesting ways to make targeted adjustments to cases, to help the teams run them more efficiently.

### RealNetworks - Assignment at GameHouse
**Post Production OS Compatibility Tester**        06/12 – 04/13

was responsible for maintaining a computer lab consisting of 12 computers, including legacy and current generation hardware. Managed workflow of all incoming titles prioritizing with input from account and project managers. Testing each title against BVT cases on each OS specified for the title, making sure that performance was consistent for the range of the hardware versus the requirements of the title.

### Volt - Assignment at Microsoft Games        03/11 – 03/12
**Test Associate**        04/10 – 11/10

acted as a stand-in lead on teams and projects when needed, assigning test cases, speaking to contact points and organizing tasks for the team.

## Skills and Experience

Splunk, JIRA, Jenkins, GitHub, Java, JavaScript, SQL, Selenium, Agile Methodologies, Performance Testing, Fault Tolerance Testing, Network/bandwidth limit testing, and various proprietary testing tools and frameworks (Mechazilla, TestGrinder, Tarzan, Grapher, Apollo, DealEstate, Gazebo)

Experienced with detailed reporting on test pass and bug results. Running, writing/evolving test passes, logically assigning, and performing cases to effectively execute a test pass.

Critical thinking, design analysis, and professional critiques. Excellent interpersonal skills and verbal/written communication. Possesses a strong willingness to learn and to improve skill sets. Not afraid to ask questions and has the passion and the drive to help create a quality product.
